**Jenna Kingston** is a multi-disciplined Ecologist with a BSc (Hons) in Biological Sciences. She has a focus on protected species and habitats.

Jenna has over four years' professional experience working within the environmental sector, including working as an Ecologist, and as a Community Engagement Officer. Jenna holds a Level 1 licence for both bats and dormice and is experienced in conducting a range of ecological surveys for a range of habitats and species including UK Habitat Classification, River MorPh, bat, dormice, reptiles, birds, badgers, and otters.

Jenna is also proficient at producing a range of ecological reports, QGIS mapping and Biodiversity Net Gain calculations. Jenna leads and contributes to many projects, regularly liaising with a variety of stakeholders including clients, and landowners. Jenna also has experience conducting ecological supervision/Clerk of Works on a range of sites including small-scale developments and larger-scale infrastructure projects.

## Professional Experience

**Professional Ecologist**  
**Burton Reid Associates, Buckfast**  
February 2026 – present

**Education and Engagement Officer,**  
**Westcountry Rivers Trust, Callington**  
October 2024– February 2026

**Professional Ecologist,**  
**Burton Reid Associates,**  
April 2023–October 2024

**Assistant Ecologist,**  
**Richard Green Ecology, Exeter,**  
June 2022– April 2023

## Protected Species Licences

Bat Level 1 Licence (CL17),  
Dormouse Level 1 Licence (CL10a)

## Professional Memberships

Associate Member of the  
Chartered Institute of Ecology and  
Environmental Management

## Key Skills

Jenna has a thorough knowledge of protected species, possessing a licence for both bats and dormice, and a good general knowledge of habitats, meaning she can confidently undertake surveys to inform Bat Survey Reports, Preliminary Ecological Appraisals, and Ecological Impact Assessments, and advising on ecological mitigation. Jenna also has particular experience in bat ecology, having lead preliminary roost assessment, ground-level tree assessments, automated activity, emergence, and night-time bat walkover surveys, and acts as an accredited agent for hibernation surveys. Jenna has assisted with the preparation of EPSL for bats and designing their associated mitigation, and supervising licensable works. Jenna is also experienced in data analysis of bat survey data.

Jenna is an excellent communicator and has key skills in stakeholder engagement and partnership development. Jenna regularly liaises with a range of professionals including other environmental professionals, contractors, architects, and developers. Jenna also has experience engaging both urban and rural communities, connecting with young people, farmers, landowners, and grass-roots conservation organisations across Devon.

## Education

### **BSc (Hons) Biological Sciences, 1st**

University of Bristol 2019-2022

### **A Level**

Biology A, Geography B, Chemistry C,  
Core Maths B

### **GCSE**

8A\*'s, 1A and 1B including English  
Language A\*, Mathematics A
